ENHANCE THE APPEARANCE OF YOUR BACKYARD WITH A SAFETY COVER!

We have used PSP Fabricating for our safety covers for many years because they use quality materials; heavy duty springs and hardware, 3'x3' grid construction and a heavy dense weave material.

PSP safety covers will improve the appearance of your backyard during the winter as it does not accumulate water and debris like a tarp cover does. The cover will stretch over the pool and securely anchor into your deck and completely blocks access to the pool while still allowing an adult to walk on the surface. The colours available are Blue, Black, Green, Grey & Taupe.

If you would like a safety cover quote, please contact our office or for more information, please [visit our website](#).

FIX YOUR LEAKING POOL BEFORE THE WINTER!

If you have a leak in your pool, it is extremely important that you schedule a leak detection and have it repaired before you decide to close your pool for the year. If you ignore it, and your pool happens to drain after you close it, this can potentially result in a lot of damage to the structure of your pool, and it will be a very expensive repair come springtime. Please [contact](#) our office to discuss our [leak detection services](#).
